

## Water Conservation Standards for Michelle Point Subdivision

The following water conservation standards are agreed upon by the James City Service Authority (JCSA) and Michelle Point, L.L.C., to be enacted at 9001 Barhamsville Road, Michelle Point Subdivision:

### Residential Development Guidelines:

- 1) Water Efficient Landscaping
  - a) Primary plantings, including those on residential lots, should be drought tolerant, low water plants. Where appropriate, non-invasive native plants are recommended. This will be based on the suggested plant list from JCSA.
  - b) Wherever possible, existing trees and vegetation should be retained.
  - c) Trees located in turf areas should be mulched.
- 2) Irrigation Systems
  - a) No irrigation systems are to be installed.
- 3) Indoor Appliances
  - a) All builder-installed hot water heaters, washing machines and dishwashers should be water efficient models.
  - b) Where appropriate, point of use and/or centrally located small-volume hot water heaters should be used.

The standards outlined above are in accordance with the James City County Service Authority's regulations regarding the conservation of water and is in compliance with proffer #3 *Water Conservation* for the Michelle Point proffers signed on January 28, 2004.
